

# Agriculture Irrigation Pump RF Remote Control Kit

Save time changing water by Turning On and Off your irrigation pump remotely.

- Switch the pump off from the comfort of your home and wait for lines to drain before leaving.
- On the spot; Switch pump off and disconnect wheel line ends.
- Switch the pump on just as soon as water change is complete

- On the spot pump switching for leaky drains and stubborn plugs.

## Simple Installation Procedure

- Power Supply Hookup
- Solid State Relay Hookup
- Pole Mount Transceiver
- Plug-in Transceiver
- Done!

## Easy expansion to monitor the pump 24/7

- Monitor the Water Pressure
- Monitor the Ditch Water Level
- Alarm on remote will activate when either is out of bounds.
- Special custom designs are available to suit your needs
